We seek an experienced and dynamic Senior Project Manager with a passion for cyber security and a focus on operational technology (OT) security and compliance within the energy sector.

The ideal candidate will have a minimum of 15 years of experience in the industry, with a proven track record of delivering complex projects within the cyber security domain.

Responsibilities:

- Manage multiple projects simultaneously from inception to closure, ensuring they are delivered on time, within budget, and to the highest quality standards.
- Develop project plans, budgets, timelines, and risk mitigation strategies in collaboration with stakeholders.
- Ensure project deliverables are compliant with regulatory requirements and industry standards, such as NERC-CIP, ISO 270001 and NIS
- Manage relationships with key stakeholders, including clients, vendors, and internal teams.
- Lead project teams to ensure project goals and objectives are met, utilizing Agile and Safe methodologies.
- Provide guidance and mentorship to stream leads

What we offer at Sweet Geeks

- Competitive salary according to qualifications
- Private health insurance
- Pension scheme
- A professional but also the informal environment with much flexibility
- A fantastic work environment in the brand-new AI Innovation House, with some talented Geek colleagues and some great opportunities to develop yourself both professionally and personally
